**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 23 and 32 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Loeb et al '017.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 24-27 and 29-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over by Loeb et al '017.

Regarding claims 24 and 30, one of ordinary skill in the art would have found it obvious to apply pulses after effecting nerve repair because nerve repair is needed to cause muscles to lift the body and Loeb et al teach commanding controller 40 to cause a series of electrical current pulses to cause muscles to lift a body for the duration of the pulse train.

Regarding claims 25 and 31, capacitors are well known energy storage devices for storing and discharging energy into tissue. One of ordinary skill in the art would have found it obvious to use a discharging capacitor in circuit 4 for creating stimulating pulses because it is well known to use capacitors in circuits for creating pulse trains.

Regarding claim 26, it is well known that nerves may atrophy; therefore, it would have been obvious to one of ordinary skill in the art to initiate nerve stimulation within a 24 hour period from effecting nerve repair.

Regarding claims 27 and 29, one of ordinary skill in the art would have found it obvious to record the stimulation response using an electromyogram because it is well known to measure muscle contractions using an electromyogram and the device may be programmed to provide trains of stimulation which may not be visible other than from an electromyogram.

#### **Allowable Subject Matter**

Claims 1-22 are allowed.

Art Unit: 3762

Claim 28 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
